639790 FLAME RETARDANT NECK PROTECTION

Non-Metal and Inherent Flame Retardant neck protection in Merino Wool and FR viscose, that provides good protection against exposure of Electric Arc. PFAS-free.

The neck protection is reversible with pattern on one side and grey melange on the other. The neck protection also prevents molten metal getting under the collar. It can be 'pulled' up and used as a balaclava which then gives protection to the ears and open skin/hair. To obtain protection to the front of the face, pull up the neck protection from the front. The neck protection can also be worn as a neckerchief and protects against cold.

Color: 82 black/grey

Size: One size

Quality: 904: Merino JX - 55% wool / 43% viscose / 2% antistatic, 220 g/m²
